

# Monday 6<sup>th</sup> July

## Good morning!

Maths: To partition 3 and 4-digit numbers in different ways.

English: To turn our responses from the lighthouse keeper into quotations using speech punctuation.

Suggested afternoon activities –

Mexico: This week we will be looking at Mexican art and crafts! Take a look at the suggested activities on the last slide. Feel free to look at ideas from other classes too!

Spelling/Grammar: This week we will be looking at using apostrophes for contraction (to combine two words such as can and not to make can't).

*Draw lines to match the words with their contracted forms.*

1) I am

2) must not

3) you will

a) you'll

b) I'm

c) mustn't

*What other contracted forms can you think of?*

*Write down as many as you can.*

*Arithmetic: To use estimating and rounding to support calculations.*

Sometimes it is helpful to use rounding to estimate answers.

Look at the example below:

$$882 - 104 =$$

We could round 882 down to 880 and 104 down to 100.

We would round them down because the ones digit is less than 5 (2 and 4).

Now try answering this:  $880 - 100$

This should be easier to do. So you can estimate that the answer will be something close to  $880 - 100 = 780$ .

Now try estimating the answer to these calculations using rounding.  
There is a rounding mini poem and example to help you remember how to do this.

$$562 + 316 =$$

$$\square \times 4 = 36$$

$$27 \div 3 =$$

**ROUNDING**

Underline the digit  
look next door.

If it's 5 or greater  
add one more.

If it's less than 5  
leave it for sure.

Everything after  
is a zero, not more.

Example:

546

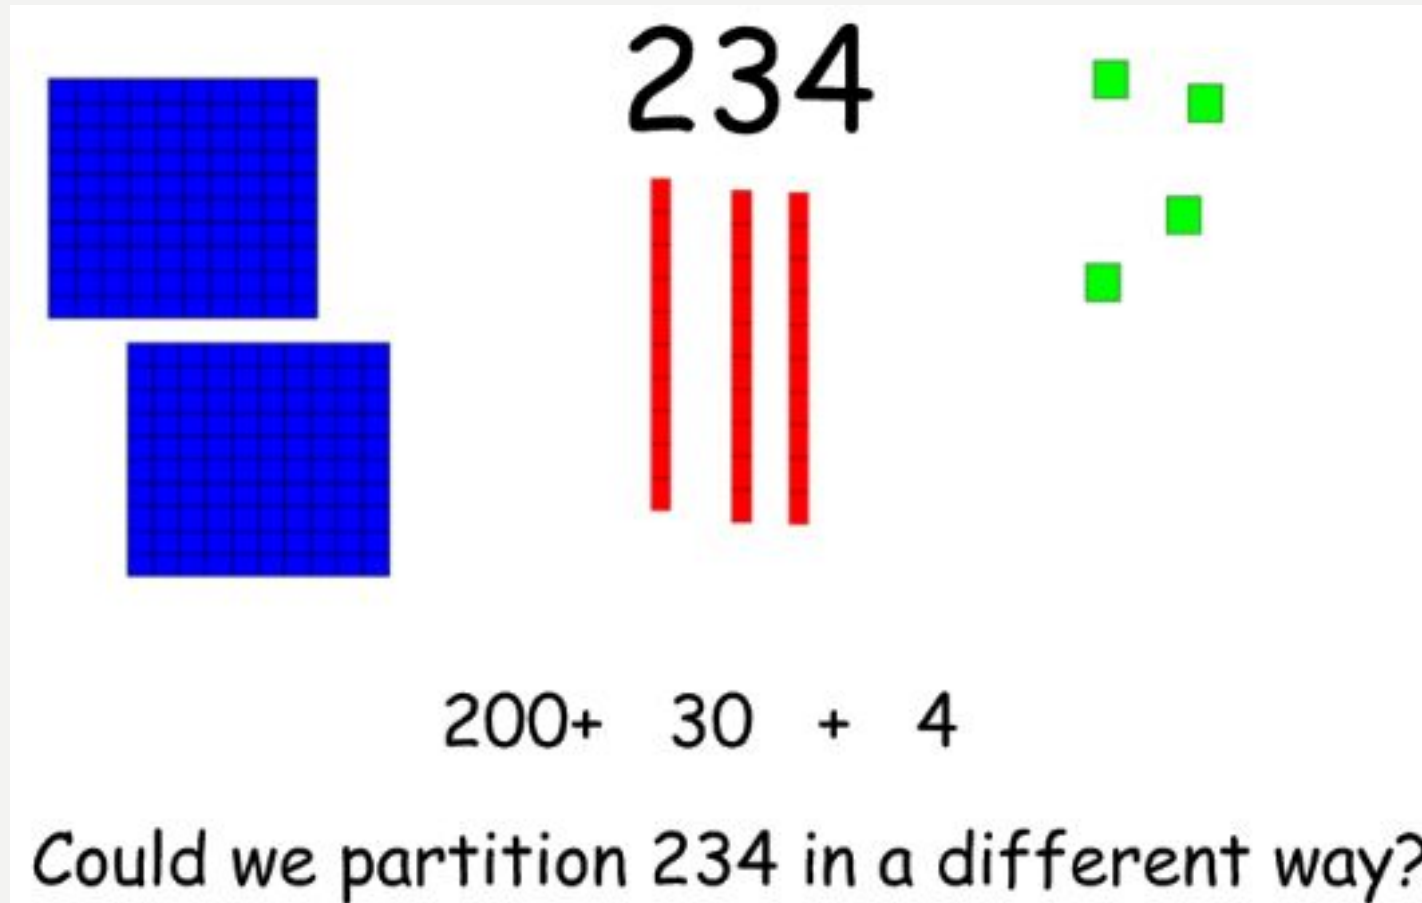

6 is greater than 5 so  
we add one more to the  
4.

550

The ones then becomes  
zero.

**MATHS:** To partition 3-digit and 4-digit numbers in different ways.

Here is an example of 234 partitioned into hundreds, tens and ones.

We could also partition 234 like this:

100, 230 and 4.

Or:

100, 100, 50, 50, 30 and 4.

How many ways can you find? You could imagine this as 234p and use coins to partition it, or you could draw a bar model to split it, as well as using numbers.

# Harry Potter

and the curse of the  
PARTITION-ius

P. L. Acevalue

Harry needs your help to help him partition 3 and 4-digit numbers in as many ways as you can!

Harry Potter is learning a new spell  
in his mathematical arts lessons.

The **partition**-ius spell (when fully  
mastered) will explode any number  
into **hundreds**, **tens** and **units**.

PARTITIONIUS

PARTITIONUS! PLEASE  
HELP ME EXPLODE  
THESE NUMBERS INTO  
HUNDREDS, TENS AND  
UNITS.

Challenge 1: How many ways  
can you find to partition these  
3-digit numbers?

1.) 476

6.) 712

Reasoning

2.) 551

7.) 447

Are there any tens to partition in 306?  
Explain your answer.

3.) 319

8.) 222

Tess says you could partition 400 into tens.  
Is she right? Show how she could or couldn't.

4.) 999

9.) 198

5.) 634

10.) 575

PARTITIONUS! PLEASE  
HELP ME EXPLODE THESE  
NUMBERS INTO THOUSANDS,  
HUNDREDS, TENS AND ONES.

Challenge 2: Can you partition  
these 4-digit numbers in  
different ways?

1.) 2355

6.) 8025

Reasoning

2.) 4996  
8025

7.) 1500

Oscar says that he could partition

3.) 1054

8.) 4111

into  $6 \times 1000$ s,  $10 \times 200$ s, 20 and 5. Is  
he correct? Explain your answer.

4.) 3548

9.) 6722

Pippa says she can partition 1054 into  
 $22 \times 50$  and 4. Is she correct? Explain  
your answer.

5.) 2773

10.) 1070

# ENGLISH:

To turn our lighthouse keeper responses into quotations using direct speech.

Today you will be taking your responses from the lighthouse keeper on Friday's lesson and putting them into direct speech.

We will then use these in our newspaper reports which we will work on the rest of the week.

Watch the clip below to remind yourself of how to use inverted commas (speech marks).

<https://www.bbc.co.uk/bitesize/clips/zvftsbk>

Now that you have reminded yourself of how to use speech marks, rewrite your responses from the lighthouse keeper adding in **speech marks** at the start and the end of his comment.

After you have done this, you will need to add a reporting verb - this is a word like **said** paired with the person speaking.

For example, **shouted the man**.

Try to use more interesting reporting verbs than said. Think about how the lighthouse keeper will be feeling about what he is saying and choose a verb that fits with this.

Example: "When I realised the light wasn't shining, I raced to the top of the lighthouse in fear," **exclaimed the lighthouse keeper**.

**Extension:** Make a word map of reporting verbs other than said that you can use in your future work.

# Mexico

*This week we will be trying to create some Mexican arts and crafts.*

1.) Create some tissue paper fan decorations for Cinco de Mayo.

2.) Paint some stone cacti.

3.) Follow this tutorial to make a mini maraca and mini sombrero:

<http://www.redroko.com/2009/04/15-minutes-make-it-cinco-de-mayo.html>

4.) Try sewing some sugar skull sachets using this tutorial:

<http://adventures-in-making.com/diy-felt-sugar-skull-sachets/>

5.) Try making some 'nichos'.

<https://www.kitchentableclassroom.com/diy-nicho-boxes/>

Can you find out the history behind them and which celebration they are offerings for?
