

**WELCOME TO OUR
HAZEL CLASS JUNCTION**

Today we are going to be thinking about
Maths.

One of our big focuses in Maths is to learn
our number bonds to 10.

We sometimes use the number blocks to help us with our maths.

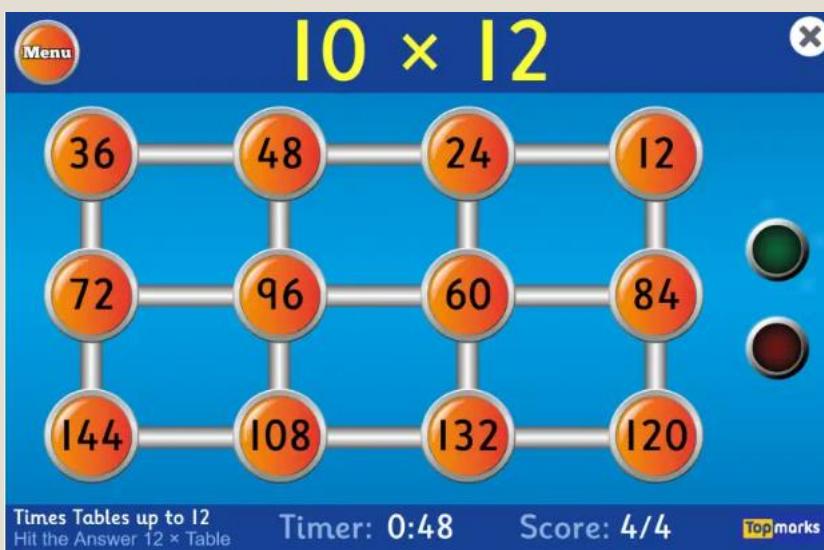

Ten Again

When the number friends all want to do different things, Ten finds a way to do them all.

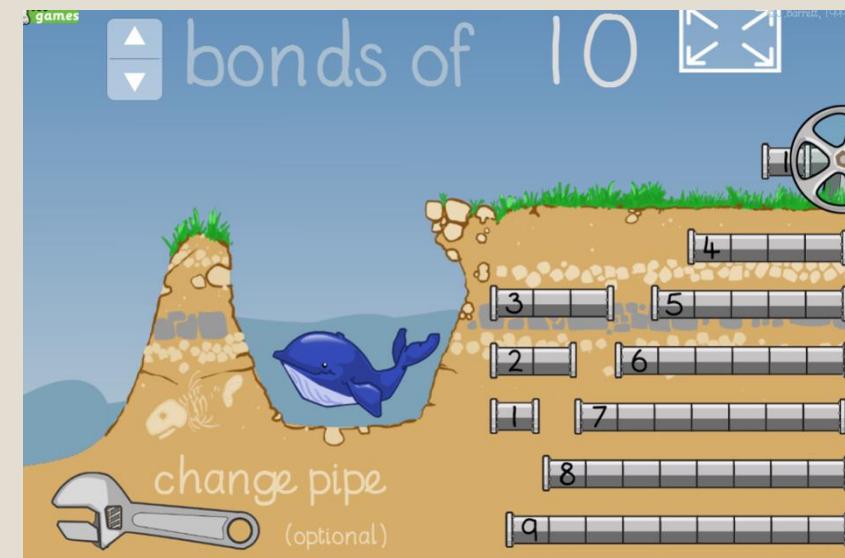

5 mins

We also like to play games to help us learn the number bonds.

www.topmarks.co.uk

www.ictgames.com

Let's do some number bond work!

Number Bond Sticks

Can you complete these number sentences using number bonds to 10?

$$7 + 3 = 10$$

Can you write a matching number sentence below each stick?

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

$$\square + \square = 10$$

Now we are going to make a game of snap.

Make 2 sets of number cards with the number 0-10.
1 set for the child, 1 set for the adult.

Make sure they're not in order and each set has had a shuffle!

Now play snap. Turn a card over each and see if they are a number bond to 10. Keep turning them over until you make a number bond. See who can say snap the quickest!

Thank you so much for coming to our junction.

If you have any comments about this afternoon, please email them through to hazel@mundford.dneat.org or write a comment in one of the speech bubbles on your table.

We would love to have some of your comments on our webpage.
